

Bio 11.1

Goals

- * Describe the process in each stage of cellular respiration
- * Describe the input and output of each stage of cell respiration

Plan

Reminder of cellular respiration steps (10 min)

Video: Amoeba Sisters

Draw out steps on board (5 min)

Acting out cellular respiration activity (Remainder)

- Students will be able to identify where each part of respiration is taking place
- Students will make a diagram of the steps of respiration, take note of how many oxygen is used and how much carbon dioxide and water is expelled

HW: Amoeba sisters review questions

Bio 11.2

Plan

Review for quiz (kahoot)

Students will be able to identify the main components of respiration and photosynthesis

Bio 11.3

Plan

Go over study guide

Quiz
