Chemistry puns worksheet (enrichment)

## Chemistry 16.3

Goals: Differentiate between different states of matter. Describe how matter changes from one state to another

Bellwork: Describe a state of matter based on their properties, appearance and how the molecules are moving.

Plan:

Discussion: describe each state of matter in terms of properties and the energy of the particles

Case study: Pitch drop experiment and how we understand liquids

Flow chart: changes in state relating solids, liquids, gases and plasma

Special case: Dry ice with sublimation and deposition

Review: states of matter kahoot
