Ensci 27.1

Goals: compare and contrast waste management in the past with our present practices

Waste Disposal and Management

Bellwork:

1) How many times do you throw something into a trash can or recycling bin daily? (your best estimation)

2) If you had to carry around your trash all day long, do you think your actions and behaviors would change?

Waste disposal and management notes:

Who pays for trash removal?

Where does it all go?

Why don't we just burn all of our trash?

Are there other options?

Video: Retro Report: Mobro 4000

Reflection: Answer in complete sentences

➤ Why did this happen? How could this situation have been avoided in the first place?

How has management of waste changed since the time of the Mobro incident to now? What work do we still have to do?
Ensci 27.2
Goals: Contrast current plan for storing nuclear waste with other proposals, weigh the pros and cons of all proposals.
Plan:
Waste management and nuclear waste 2/20/2020
Bellwork
1) Would you rather have many small landfills all over the place or one big landfill in one location in the United States?
2) Would you want one of these locations to open near where you live? Why?
Video: Nuclear Waste
Pre-video:
Describe how you think nuclear waste is stored in this country. How would you direct the department of energy to do it if you were the president?

Notes:	
Post Video:	
How is the situation in the United States different from your initial conceptions? question)	(in the pre-video

What do you think is the best course of action for our country in terms of nuclear waste? Should we change anything we are doing? Support your answer with evidence from the video.
